

# A4 Stainless Steel EPDM Washer

**Material:** A4 (316) Stainless Steel  
BS EN ISO 3506-1:2009

## Ordering Example

Item No	Diameter	Length
1 5 1	0 5 5	0 0 0 0

Item No.	Size	Outer diameter	inside diameter	thickness
		d1	d2	s
151	M5.5(#12)	15.9 - 16.1	6.0	2.9 - 3.1
151	M6.3(#14)	18.9 - 19.1	6.8	2.9 - 3.1

Unit in mm

## Correctly Install Self-Drilling Screws with EPDM Washer

When installing Stainless Steel Self-Drilling Screw with EPDM Washers, depth control must be used. Adjustable depth control will prevent the deformation of the EPDM washer (washer with elastomer seal). If the EPDM washer is properly installed, you may see the rubber seal overlap. But if the metal back of the sealing washer changes from convex to concave, the screw was installed too tight.
